

# Midbrains Academy

## Scope of Testing

### 1. Functional Areas to Cover

- Home Page Load Verification
  - Navigation Menu (All links working properly)
  - Course Pages (MERN, Testing, etc.)
  - Contact Form Submission
  - Enquiry / Lead Form
  - Buttons & call to action (send email)
- 

### ◆ 1.Task Requirements

#### 1. Automation Tool

Use any one:

- Selenium (Java / Python / JS)
  - Playwright (Preferred)
  - Cypress
- 

### ◆ 2. Test Scenarios (Must Automate)

#### Scenario 1: Homepage Validation

- Verify page loads successfully
- Validate title C URL
- Check main sections visibility

#### Scenario 2: Navigation Testing

- Click all menu items
- Verify correct page redirection

#### Scenario 3: Training Page Testing

- Open any training page
- Verify training details (title, description, buttons)

### Scenario 4: Contact Form Testing

- Enter valid data → send email → success message
- Enter invalid data → validation error

### Scenario 5: Button Click Flow

- Click "Enroll Now" / "Apply Now" / "send Email"
- Verify redirection or form opening

---

### ◆ 3. Framework Expectations

- Use Page Object Model (POM)
- Use reusable functions
- Proper folder structure
- Use assertions
- Add waits (explicit preferred)

---

### ◆ 4. Deliverables

You must submit:

1.  Automation Code (GitHub repo)
2.  Test Case Document (Excel or PDF)
3.  Bug Report (if any found)
4.  Execution Video (Screen recording)
5.  README file with setup steps

---

### Bug Reporting Format

- Bug ID
- Title
- Steps to Reproduce
- Expected Result
- Actual Result
- Screenshot / Video
- Severity (Low / Medium / High)
